International Performance Audit Certificate Program

Advancing excellence in performance auditing through professional development.

CAAF International Performance Audit Certificate Program

01 Practitioner-Led Learning

Learn directly from our experienced instructors with extensive expertise in performance auditing, public sector governance and leading complex audits.

02 Practical Learning

Strengthen performance audit skills across the entire audit lifecycle—from planning and evidence collection to reporting and follow-up. Go beyond compliance to assess performance, identify opportunities for improvement, and deliver greater value through your audits.

03 Global Perspectives

Exchange ideas and leading practices with peers around the world while building lasting professional relationships. Gain new perspectives on public sector auditing through international collaboration and the sharing of diverse experiences.

04 Certificate

All participants will receive a certificate for the full program or for their selected week. Return to your organization equipped with practical knowledge, proven approaches, and renewed confidence to strengthen performance audit quality, enhance oversight, and contribute to better outcomes for citizens.

Experience Canada's Capital

Throughout the program, participants gain first-hand exposure to Canada's public institutions and governance through experiences such as visits to Parliament, the Office of the Auditor General of Canada, and other site visits. These experiences provide valuable insight into Canada's public sector and complement the program's classroom learning.

Participants will also experience Canada's capital through a variety of cultural and social activities. From visits to the Canadian Museum of History to ice skating on the Rideau Canal, attending a hockey game, and other uniquely Canadian experiences, these activities enrich learning, foster international collaboration, and create lasting professional connections.
